

Anti-Social Behaviour information on CADIS

For current trends [click here](#).

For statistics for 2009/10 [click here](#).

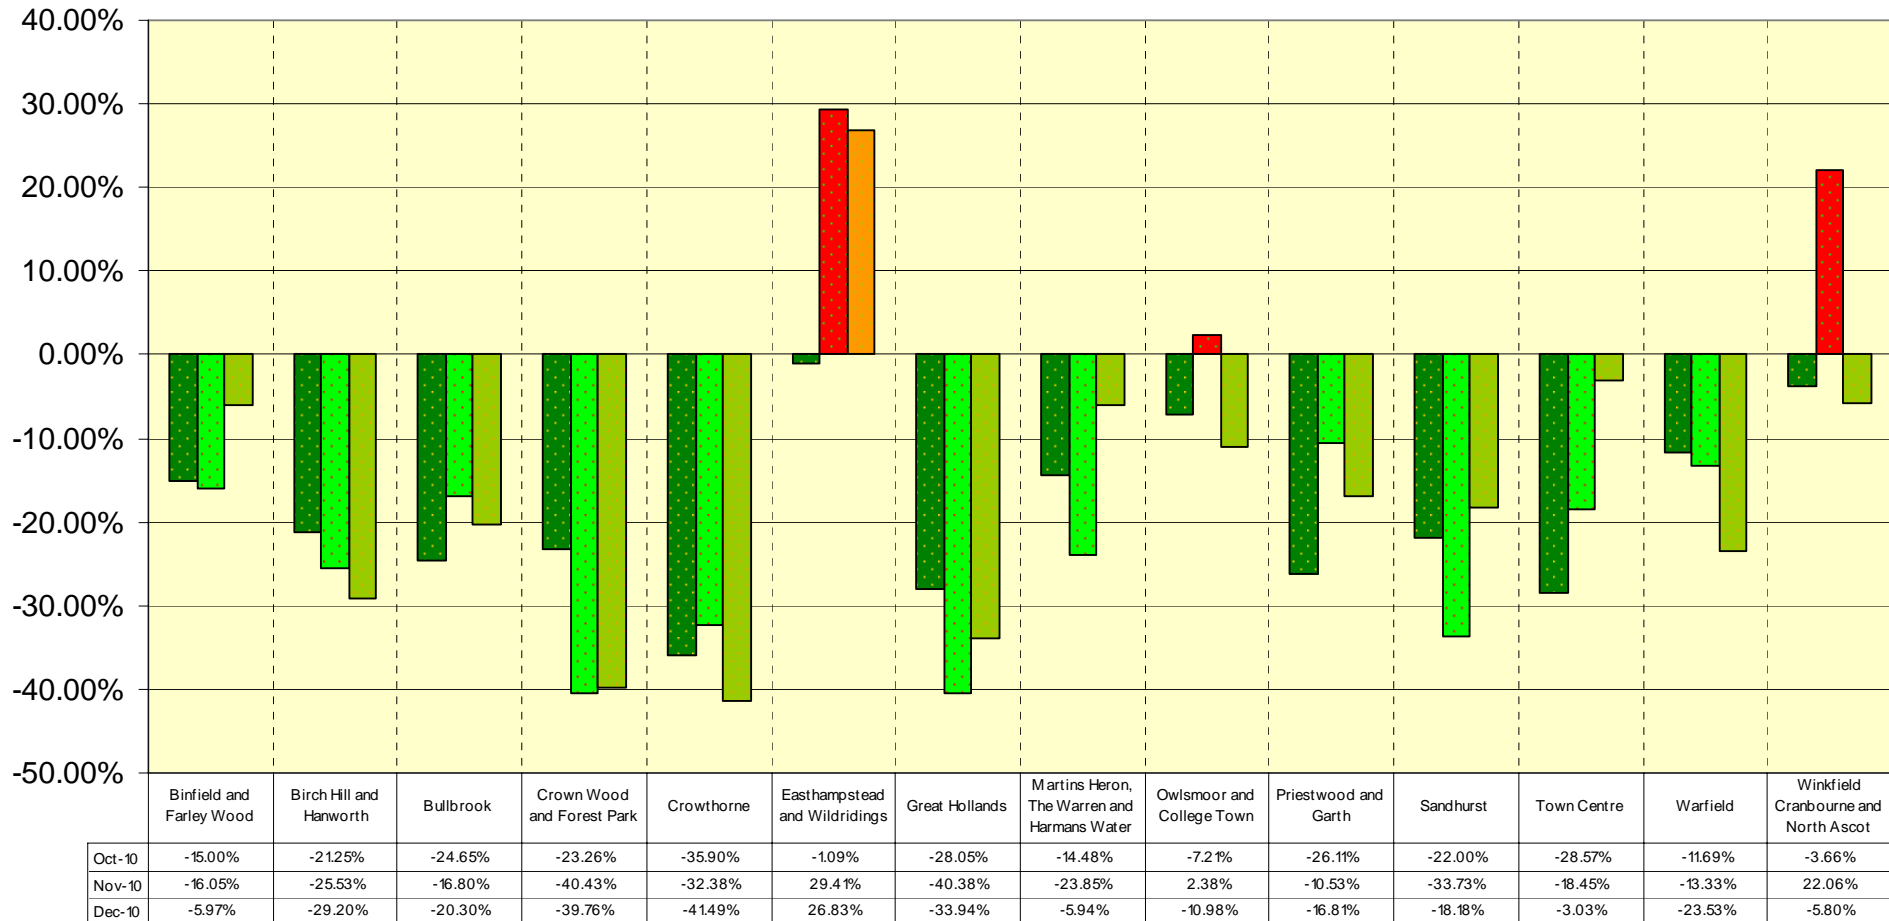

Notes:

1. The reported site of some incidents is not detailed enough to be addressable so this very small minority is not included in CADIS.
2. The numbers may vary very slightly from time to time as incidents are reclassified.
3. All the information here is based on un-audited data.

Current Trends

Home Office guidelines recommend comparing statistics for the most recent 3 months with the same 3 months in the previous year. The graph on the next page shows this pictorially for each neighbourhood.

Percentage change in Level 2 Anti-Social Behaviour recorded on CADIS using three month rolling averages*

* Three month rolling averages are worked out by adding the numbers of incidents for this and the previous 2 months for each neighbourhood.

This number is then compared to the same period last year to see the variation year on year.

The above graph shows these comparisons for the most recent 3 months.

For example, the figure for Crowthorne of -41.49% in December represents the percentage change between the total number of incidents in October - December 2009 and the total number of incidents in October - December 2010.

By doing this calculation over three month periods it allows for seasonal factors and reduces the extent to which percentages are influenced by monthly variations.

Further analysis shows for the last 3 months (**October 2010 – December 2010**) that there were 0.0108 Level 2 incidents per head of population across the borough (using the population figure of 109,617 recorded in the 2001 Census).

For each neighbourhood these figures are further broken down below by:

- **Numbers per Head of Population for Neighbourhood** – this is calculated by dividing the total number of Level 2 incidents in the Neighbourhood by the estimated population¹ of the Neighbourhood. Note that Bracknell Town Centre has a large number of visitors and a relatively small population so this may result in a relatively high average compared to the borough-wide figure.
- **Number of Incidents** – this is the total number of Level 2 incidents that took place in this Neighbourhood for the period stated
- **Difference** – this compares the current number of Level 2 incidents for the period with the level during the same period 12 months previously. The positive or negative number indicates the difference between last year and this year. For example, -9 indicates that the number of incidents has fallen by nine compared with the same period 12 months ago.

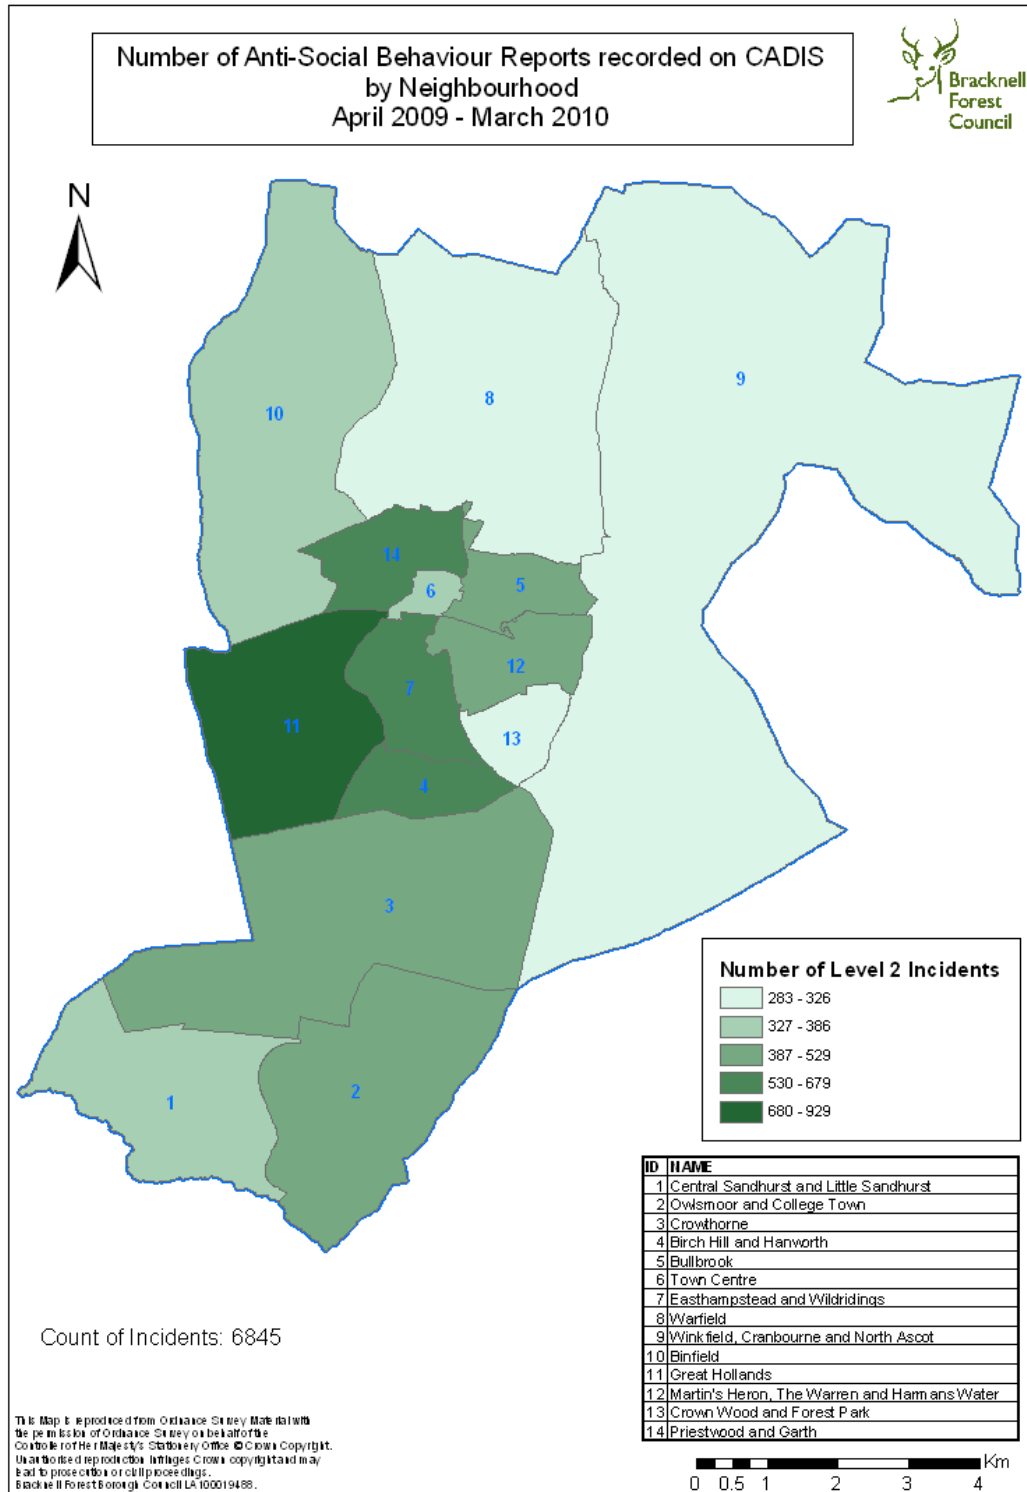

Neighbourhood	Estimated Population of Neighbourhood	Number of Incidents per Head of Population for Neighbourhood	Number of Incidents	Difference compared to the same period in the previous year
Binfield and Farley Wood	7475	0.0084	63	-9
Birch Hill and Hanworth	8851	0.0110	97	-39
Bullbrook	5038	0.0212	107	-30
Crown Wood and Forest Park	8466	0.0063	53	-35
Crowthorne	6711	0.0082	55	-42
Easthampstead and Wildridings	8591	0.0189	162	36
Great Hollands	9992	0.0110	110	-11
Martins Heron, The Warren and Harmans Water	7563	0.0126	95	-9
Owlsmoor and College Town	12309	0.0061	75	-9
Priestwood and Garth	7386	0.0130	96	-23
Sandhurst	8494	0.0065	55	-20
Town Centre	364	0.2637	96	-7
Warfield	9226	0.0057	53	-20
Winkfield Cranbourne and North Ascot	9151	0.0075	69	-4

¹ * All population calculations are based on the 2001 Census from the Office of National Statistics – see www.statistics.gov.uk

Anti-Social Behaviour in 2009/10

During 2009/10 reports from 2 new sources were added to CADIS: Bracknell Forest Council's Landscape Services and Bracknell Forest Homes' fly tipping reports. These were represented by 729 incidents of the 6845 Level 2 incidents recorded on CADIS during the year. Comparing like with like, i.e. excluding the new sources of data, there was an 11.6% reduction in Level 2 incidents compared to 2008/09. Looking at all Level 2 incidents, these were distributed across the borough as in the map below:

Trends

There were particularly large falls in numbers of reports of:

Street Care – Dumped Rubbish	BFC - Street Care	-47.4%
Vandalism	TVP and Bracknell Forest Homes	-23.9%
Road Hazard	TVP	-21.9%
Noise-Domestic	BFC - Environmental Health	-19.0%
Fights	TVP	-17.7%
Noise - Dogs Barking	BFBC - Environmental Health	-15.0%
Street Care – Fly Tip	BFBC - Street Care	-13.8%
Harassment	TVP and Bracknell Forest Homes	-13.5%
Dangerous Driving	TVP	-11.2%

Increases were observed in:

Threat	TVP	11.5%
Assault	TVP	28.6%
Neighbour Dispute	TVP	36.5%

Crime and Disorder Reduction Partnership (CDRP) Plan 2008-11

As part of the CDRP Plan 2008-11, 6 key indicators of anti-social behaviour are selected each year, either because of the high numbers or because of their impact on the borough. These indicators were addressed by the Anti-Social Behaviour Sub-Group, the Cleaner Borough Group and the Graffiti Sub-Group of the CDRP.

During 2009/10 these indicators were as follows with the resultant percentage change in numbers indicated:

Indicator	Target	Achieved
Dangerous Driving (from all sources)	-2.0%	-12.1%
Dumped Rubbish, Fly Tipping and Heavy Littering (all	No	-22.0%

sources except BF Homes)	increase	
Harassment (from all sources)	-2.0%	-13.4%
Noise reports to the police and BF Homes and Domestic Noise complaints to the council	-2.0%	-1.3%
Road Hazard	-2.0%	-21.9%
Vandalism	-5.0%	-16.2%

Also as part of the Plan, four neighbourhoods with the highest number of incidents per 1000 households were selected and actions taken in these particular areas. All had targets of a 2% reduction. Two neighbourhoods exceeded this with falls of 4.3% and 6.4%. The third saw numbers fall by 1.3% and the fourth experienced an increase of 10.6%. There have been problems with anti-social behaviour at varying levels at the local shops in this latter neighbourhood, and a number of interventions are put in place when situations arise. In addition to this, issues around one housing development have come to light, and this is now being focussed on in the Anti-Social Behaviour Working Group, by neighbourhood policing teams, and the company who own the development.

Some of the actions taken by Bracknell Forest Council

Overall numbers of incidents included in the Bracknell Forest Council reports in 2009/10 increased by 14.8% compared to 2008/09 but were down by 16.4% compared to 2007/08. This apparent increase was caused by the inclusion of more sources of data; comparing like with like showed a **reduction of 17.4%** measured against 2008/09 and 37.9% against 2007/08.

Some of the key anti-social behaviour types reported by Bracknell Forest Council are dumped rubbish, fly tipping and graffiti. The Cleaner Borough Group formed at the start of 2008 has continued to successfully focus on these.

Fly tipping reports would appear to have increased by a large number this year but this was solely because of the introduction of reports provided by Bracknell Forest Homes who recorded a total of 677 incidents during the year. Reports handled by Street Care for **fly tipping fell by 13.8%** this year giving a truer picture of fly tipping related problems. **Dumped rubbish** reports dealt with by Street Care experienced an even larger reduction with a **fall of 47.4%**.

During the year Environmental Protection have been instrumental in the success of:

- 20 Fixed Penalty Notices issued
- 5 Simple Cautions
- 2 Prosecutions
- Overt cameras in place at a recycling site and a community centre

Some of the actions taken by Thames Valley Police

Thames Valley Police reports were **down 3.4%** on 2008/09 and 6.7% lower than in 2007/08.

During the year CADIS has contributed to the continued success of the Joint Tasking meeting chaired by the local police area commander, in particular related to analysing the location and frequency of assaults and also to potential drug house closures. The police have maintained a close watch on crime and anti-social behaviour notably via Operation Ladybird and Operation Lion Cub, with CADIS being used to map potential hot spot areas.

Some of the actions taken by Royal Berkshire Fire and Rescue Service

Cumulative figures have fallen year on year since the start of the CADIS project in 2003 with annual figures now more than **70% less than in 2003/4**. Notably this year has seen a **fall of over 27%** compared to 2008/09. Large reductions have occurred in both FDR1 fires and hoax calls.

As well as their normal working practice, RBFRS have continued to work with the CDRP on Partnership Patrols in areas of concern established by CADIS and have identified any anti-social behaviour in the neighbourhoods patrolled. Example problems found include graffiti, void properties (in particular garages either in a dangerous condition or with potentially flammable materials insecure inside), fly tipping and dumped rubbish.

RBFRS are also working with the partnership to focus on the wildlife areas in the south of the borough which have been subject to deliberate grass fires in the past.
