

# Jock's Lane & The Cut

This route has been selected as part of a series of easy access routes which Leisure Services will be issuing over the next two years.

These routes have not been specifically adapted for wheel chairs or scooters but they are free of stiles and other serious obstacles which make rural paths difficult for the less mobile. In all cases the surface is adequate but some sections will be rough and difficult for manually propelled wheelchairs. The guide notes clearly indicate the degree of severity for different categories of user.

Enjoy the opportunity to get out and about and please let us have feedback and comment on how well they meet your mobility needs.

## Wheelchair Ratings

The following categories should act as a **guide** to the overall difficulty of the routes for wheelchair users. Please consider these and your own abilities carefully before setting out on your route.

**Easy** - No more than normal outdoor fitness or exertion required.

**Moderate** - Short stretches may be moderately strenuous. The surface may be stony with some gradients.

**Challenging** - Stretches will be strenuous. Unsurfaced paths may be bumpy and stony with some significant gradients.

Most battery operated wheelchairs and scooters will cope easily with the Easy and Moderate routes.

Follow the path along the west side of the Cut, with Jocks Copse and Tinkers Copse on your left. (A separate leaflet about the three copses is available from the Council).
