

# We can bring The Look Out On The Road to your school

The children love watching the stars come to life in our inflatable planetarium.

## Little Stars (especially for the under 5's)

Get star struck in our starlab show Little Stars.

Join Ursa and Leo on their amazing journey through space and find out what they see. Pupils look at the Sun, Earth, Moon and the Solar System. Wonder at the stars and the patterns they make.

## Exploring the Solar System (Years 3-7)

The link between the Sun, Moon and the Earth is a difficult concept to get across in the classroom. This concept is clearly explained in this show. The show also includes the phases of the Moon, the Solar System, planets and stars constellations, light pollution and much more!

## Space Stories (Years 1-2)

Join Ernest the Bear as he sets out to visit the Moon and discovers the planets and stars along the way. Space Stories is an interactive, multi-sensory Starlab show for Key Stage 1 children.

Pupils will learn about the stars and patterns of the stars, the Earth as a planet in space and other planets.

Starlab requires 4.2m headroom, 7m x 7m floor space, 240v ac mains power supply

## Booking

Our highly experienced presenters will come to you.

They can tailor the shows to the ages and abilities of the children.

**Session length: 35-45 minutes • Maximum class size: 35 • Maximum of 4 sessions per day.**

Cost for Starlab £360 per day, Fun Shows £295 per day plus mileage.

For 4 sessions of 35 children it works out at £2.57 per child (plus the mileage cost)

## Dinosaur

Find out who ate who in the dinosaur world and how we know about it. Help us recreate the smell of a T-rex (yuck!) and find out lots more dinosaur facts.

## Yucky You

Find out why our bodies are yucky!  
How much hair do we lose in a day?  
Why does tartar form on our teeth?  
What causes us to burp?  
What happens to food when we eat it? A truly yucky show which answers all the questions we were afraid to ask!

## Slime Show

Fantastic fluids take the stage in this gooey, gungy extravaganza!  
Explore the amazing properties of slime and find out why it behaves in such strange ways. Discover the secrets of making your own home-made slime!

## Brilliant Brain Show

How does your brain control co-ordination?

How can you fool it with optical illusions and tricks?
