Bracknell Forest Council

Consultation on Scope of Comprehensive Local Plan - Summary of Responses

February 2016

Introduction

1.1 The Council published its intention to prepare a Comprehensive Local Plan (CLP) in its Local Development Scheme 2015-2018 which came into effect on 30th June 2015. The CLP will set the vision, objectives and strategy for the distribution of development including housing, economic and retail development and new infrastructure for the Borough up to 2036.

Regulation 18 Consultation

- 1.2 Regulation 18 of the Town and Country Planning (Local Planning) Regulations 2012 requires the Council to notify various bodies and stakeholders that it is preparing a Local Plan and to invite comments about what that plan should contain. This is the start of the Local Plan preparation process.
- 1.3 The Council consulted on the scope of the CLP in accordance with Regulation 18 for six weeks between 21 October and 2 December 2015. Consultees on the planning policy consultation database were made aware of the consultation by email or letter. The consultation database includes the following:
 - Statutory bodies and organisations
 - Utility providers
 - Service providers
 - Planning agents
 - Developers
 - Land owners
 - The general public
 - Relevant local interest bodies and organisations
 - Bracknell Forest Town and Parish Councils
 - Local Councillors
- 1.4 The consultation was publicised on the Council's website and approximately 4,400 letters and emails were sent out informing stakeholders of the Council's intention to prepare a CLP and the policy topics to be covered. These are listed below (see Appendix 1 for full wording of the letter/e-mail):
 - development within the Green Belt;
 - development within the Countryside;
 - design, including residential extensions and shop fronts;
 - environmental issues such as flood risk and water quality;
 - heritage assets;
 - the natural environment and biodiversity including landscape, green infrastructure and the Thames Basin Heaths Special Protection Area;
 - infrastructure needs including open space, sport and recreation and community facilities;
 - town, district and local centres;
 - development affecting employment sites;
 - housing needs including those for:
 - Gypsies, Travellers and Travelling Showpeople
 - affordable housing;

- healthy and inclusive communities, and,
- climate change including the delivery of renewable energy and sustainable construction.

Comments Received

1.5 In total 24 consultees responded to the consultation (see Appendix 2). The main issues that were raised are summarised below.

General Comments

1.6 Some concern was raised that local people were not made aware of the consultation and that more detail was needed. On the whole, however, consultees supported the principle of a CLP.

Table 1: Summary of General Comments

Summary of main issues raised	Response
The majority of local residents were unaware of the document as it was not made available in the local library and was only available on the website.	No documents were produced. Information on the scope of the CLP was set out via letters, emails and put on the Council's website.
It would have helped if more guidance had been given and a glossary of terms included with all acronyms listed	A glossary of terms was not considered necessary as the only acronym used was defined. However, a glossary of terms will be included in future consultation documents.
No comment as the Council makes decisions regardless of the public's view.	Noted.
The headings given need expanding so that meaningful comments can be made.	Noted. The consultation was on the scope of the CLP. Further detail will be included at later stages in the plan making process.
The scope is adequate.	Noted.
Support the review of the Core Strategy and production of the CLP.	
The scope of the CLP is extensive and	
acceptable. Specifically supports policies	
relating to: site allocations for specific uses,	
design, including shop fronts; town, district	
and local centres; heritage assets; and	
development affecting employment sites.	
No objections to the policy topics.	
Accept that the CLP will not be concerned	
with Minerals and Waste.	

Comments on the Proposed Policy Topics

1.7 Comments were not received on all suggested CLP policy topics. The majority of responses were concerned with detailed matters that it is intended to cover under the proposed policy topics.. For example, 'the natural environment and biodiversity including landscape, green infrastructure and the Thames Basin Heaths Special Protection Area' topic generated a number of detailed comments on policy content including suggested

- policy wording. The 'housing needs' policy topic also generated a number of comments on the type of housing which should be provided, for example, the encouragement of all types of low cost housing and the need for specialist accommodation.
- 1.8 Concerns were raised by a number of consultees that the topic of 'infrastructure needs, including open space, sport and recreation and community facilities' policy topic might not cover road and transport infrastructure or healthcare. These matters will be covered by the CLP although it was not explicitly mentioned under the general policy topic heading. Detailed comments on the proposed policy topics are set out below.

development.	•
Need to consider the protection of the best and most versatile agricultural land. Soils should be considered under a more general heading of sustainable use of land and benefits to the ecosystem.	The site selection process that will take place at a later stage, will consider the grade of agricultural land.
Proposed policy topic: town,	district and local centres
The CLP should take into account the aspirations of the Town Centre regeneration.	The next stage of the regeneration of Bracknell Town Centre will be considered through policy formulation and site allocation.
Regeneration of High Streets should be addressed.	A Retail and Commercial Leisure Study has been commissioned which will begin to look at this issue. This evidence will be used in the formulation of any retail policies.
Proposed policy topic: developme	ent affecting employment sites
Need to identify which sites should remain exclusively for employment uses and supporting activities (nurseries, gyms etc). Should use wider definition than B use classes to allow for future changes in nature of employment.	The evidence base includes an Economic Development Needs Assessment and a Retail and Commercial Leisure Study which will look at the overall need for floorspace for economic development according to the definition set out in the NPPF.
Proposed policy topic	c: housing needs
Support the aims of Core Strategy Policy CS16: Housing Needs of the Community and note that this could reasonably be carried forward into the CLP. Policy CS17: Affordable Housing would however benefit from being updated to recognise the importance of Rent to Buy models such as Rentplus. Need to encourage all types of low cost	The Strategic Housing Market Assessment (SHMA) looks at the need for affordable housing in the Borough. A policy for affordable housing will be developed under this topic heading, bearing in mind the national definition of affordable housing.
housing not only those secured for Registered Social Landlords. Institutional build to rent/private rental sector housing schemes to include affordable rented.	
Need to cover accommodation for staff on equestrian and similar developments.	The matter of accommodation for such uses will be considered under development within the countryside.

Other Comments

1.9 Other comments were received which were not directly related to the scope of the CLP but were concerned with broader issues including the process of producing the Plan.

Table 3: Other Comments

Summary of main issues raised	Response
Other com	nments
New development needs to be co-ordinated with the infrastructure it requires and needs to take account of the capacity of existing infrastructure. It is vital that the Local Plan demonstrates and assesses the deliverability of any required infrastructure to accommodate proposed growth.	The infrastructure needed to support the level of growth needed will be addressed. An IDP will be produced in parallel with the CLP.
Bracknell Forest Council and Wokingham Borough Council policies need to be aligned with each other. Need to include a section that looks at neighbouring councils and development activity within three miles of Bracknell Forest's borders.	The Council will work with adjoining Councils on growth proposals including under the Duty to Co-operate requirements.
Need to have an up to date evidence base and demonstrate how the historic evidence base has informed and influenced the Plan's policies and site allocations. Expects the consideration of the potential impact of development on the historic environment to influence the choice of sites.	A final methodology will be agreed for the Strategic Housing and Economic Land Availability Assessment. A methodology will also be drawn up for site selection. Heritage assets will be a consideration. All proposals will also be subject to Sustainability Appraisal (SA)/SEA.
Promotes various sites for housing development.	The Council has carried out a call for sites and will be assessing them according to the final methodology agreed for the Strategic Housing and Economic Land Availability Assessment.
Queries whether there is a correlation between housing needs and economic development. Queries how much the existing connecting infrastructure (roads cycle-ways, public	The SHMA has taken into account economic projections as well as demographic projections in arriving at an Objective Assessment of Need. Wording of Letter/Email Sent to Consultees

Comprehensive Local Plan: Consultation on Scope of Document

I am writing to you as an interested party on our consultation database about the Council's intention to prepare a new Local Plan for the Borough. The decision to proceed with a Comprehensive Local Plan (CLP) was taken by the Council during the Summer (see Bracknell Forest Local Development Scheme June 2015). At this early stage we are inviting comments on what the Plan should contain.

The consultation period runs from 21 October 2015 to 2 December 2015.

The Comprehensive Local Plan will set the long term vision and development strategy for the Borough up to 2036. Once adopted, it will replace many of the saved policies in the Bracknell Forest Borough Local Plan (2002) and the Core Strategy (2008). It will therefore be wide ranging in terms of the issues that it will cover. In summary, the Plan will include the following:

A vision, objectives, and strategy for the level and distribution of development in the Borough up to 2036, including housing, economic and retail development and new infrastructure;

It will include policies relating to:

- development within the Green Belt;
- development within the Countryside;
- design, including residential extensions and shop fronts;
- environmental issues such as flood risk and water quality;
- heritage assets;
- the natural environment and biodiversity including landscape, green infrastructure and the Thames Basin Heaths Special Protection Area;
- infrastructure needs including open space, sport and recreation and community facilities;
- town, district and local centres;
- development affecting employment sites;
- housing needs including those for:
 - Gypsies, Travellers and Travelling Showpeople
 - affordable housing;
- healthy and inclusive communities, and,
- climate change including the delivery of renewable energy and sustainable construction.

The Comprehensive Local Plan will include site allocations for specific uses, including housing and employment uses, and will need to be based on a range of up to date evidence which is currently being prepared. Background work that has already been completed can be viewed on the Council's website at http://www.bracknell-forest.gov.uk/evidencebaseforcomprehensivelocalplan.

The only significant area of planning policy that will not be included in the Comprehensive Local Plan is that concerned with minerals and waste. The intention is to produce a joint Minerals and Waste Local Plan with a number of other Berkshire Authorities. As part of the production of the evidence base, the Council will be undertaking targeted consultation. The Plan will also be informed by a Sustainability Appraisal. Consultation on

a 'Sustainability Appraisal Scoping' Report took place with key stakeholders in June/July 2015.

The outcome of the above work will lead to a consultation on an 'Issues and Options' document in Summer 2016.

We would be grateful for any comments that you would like to make on these, or other issues that you think should be covered in a Comprehensive Local Plan. Further detail on the timetable for the Comprehensive Local Plan and on current development plan documents can be found at http://www.bracknell-forest.gov.uk/developmentplan.

In order that we can keep our consultation database up to date, we would be grateful if you could confirm your contact details are correct by emailing them to the following address: development.plan@bracknell-forest.gov.uk. If you have received this notification via letter it would be helpful if you could provide us with an email address as we will then be able to notify you of consultations more easily. If you no longer wish to be contacted about future consultations, please let us know so that we can update our database accordingly.

If you require further information on the issues raised in this email, please do not hesitate to get in touch with a member of the Development Plan Team by calling 01344 352000 or emailing development.plan@bracknell-forest.gov.uk.
