

Welcome to Lily Hill Park's mystery brass rubbing trail!

There are 23 points of interest around the park, each with a different brass rubbing showing something you would find in nature. Use the space below for your brass rubbings. Don't forget to bring a crayon!

Father Oak

Hint: This majestic bird has an average wingspan of 1.85m or 6ft!

Bog Garden

Hint: This animal doesn't need to drink as it can absorb water through its skins!

Stag Beetle Loggery

Hint: This beetle is Britain's largest insect.

Giant Picnic Bench

Hint: This insect has enormous eyes, giving it almost 360 degree vision!

Welcome to Lily Hill Park's mystery brass rubbing trail!

Wildflower Meadow

Hint: An individual of this species will produce just 1/12th teaspoon of honey in their lifetime!

Yew Walk

Hint: This flying mammal can live for up to 30 years!

History Tree

Hint: This animal has the largest natural distribution of any land mammal in the world except humans!

Wellingtonia Trees

Hint: The bark of this tree can be over 60cm or 2 feet thick!

Welcome to Lily Hill Park's mystery brass rubbing trail!

Forester's Public House

Hint: This mammal is the biggest land predator in the UK!

Amphitheatre

Hint: Often found in woodlands, these live on the roots of plants and trees.

Summer House

Hint: This bird is well known for its incredible eyesight, but it has exceptional hearing as well.

Orchard

Hint: This iconic British bird has light blue eggs and will even sing at night!

Welcome to Lily Hill Park's mystery brass rubbing trail!

Historic Driveway

Hint: The nuts of this tree are traditionally at Christmas and are exceptionally high in vitamin C.

Story Telling Throne

Hint: In winter this mammal drops its heart rate and temperature to the bare minimum for survival.

Windblown Tree

Hint: This bird loves water and will stand still as a statue waiting for their next meal to swim by.

Rhododendron Collection

Hint: This plant loves an acidic soil and is the national plant of Nepal.

Welcome to Lily Hill Park's mystery brass rubbing trail!

Pond and Boardwalk

Hint: This amphibian has the ability to regenerate its limbs, tail, heart, spine, eyes and brain!

Traditional Hay Meadow

Hint: These insects smell with their feet!

Edwardian Water Garden

Hint: This plant is 'bearded' or 'non-bearded' depending on whether the petals are smooth or hairy.

Stumpery

Hint: These ancient plants have been around for 340 million years!

Welcome to Lily Hill Park's mystery brass rubbing trail!

Veteran Oak

Hint: These trees can provide a haven for over 2,300 wildlife species, more than any other tree in the UK!

Ha-ha

Hint: Old English folklore tells these plants would ring at dawn to call fairies to the woods!

Lily Hill House

Hint: These structures keep seeds safe over winter by closing up in cold weather.

Lily Hill Park is open to all, every day of the year. It features 56 acres of restored, heritage parkland and gardens for you to explore and enjoy. It has an extensive network of well surfaced footpaths for accessibility.
