

Our action towards net zero 2050

Converted all of our street lighting to LEDs

Improved our waste recycling rates from 43% to 56%

New interactive cycling route maps launched

Purchased 100% renewable electricity for supplying the council estate since April 2021

Secured Public Sector Decarbonisation funding to help us create heat decarbonisation plans for our property estate

35 EV charging points across borough currently with further 32 planned to be delivered shortly

New pedestrian and cycle crossings created in Binfield and Crowthorne.

Embedded climate change impacts within all council project decision reports

Have improved the average energy rating across all borough homes to a

'C'

187,132 green miles logged on the EcoRewards active travel scheme in 21/22 with a calculated CO2 saving of 40.8 tonnes

Have seen improvements in air quality measurements in both of our targeted areas – Crowthorne High Street and the A322/A329 link

Initiated a weekly household kerbside food waste collection diverting more than 6,000 tonnes away from landfill in the first year.

Supported more than 500 residents to help make their homes more energy efficient

Planted almost 3,000 trees in the last year alone

Worked to align climate change ambitions within all Public Health policies

Reduced total waste going to landfill to just 7%

14% reduction in the Council's direct CO2e emissions in last 2 years
