Good afternoon,

As a resident of Little Sandhurst, I support the proposals contained in the Sandhurst Neighbourhood Plan (SNP). My reading of the Sandhurst Neighbourhood Plan is that it is primarily a **protective plan rather than a growth plan**. It does not allocate major new housing sites and instead focuses on protecting countryside, lakes, woodland, and local character while steering any new development toward existing built-up areas and brownfield land. The biodiversity and environmental sections are among the strongest parts of the plan.

As someone who spends a lot of my leisure time outside either walking my dogs or running, I particularly value:

- Horseshoe Lake and Grove Lake,
- nearby countryside,
- wildlife habitats,
- keeping separation from Crowthorne and Yateley,
- limiting large-scale development,

I am pleased that the SNP recognises and puts protections in place to safeguard these.

Kind regards

[REDACTED] Saville
