

Bracknell Forest Housing Land Supply (HLS) calculation as at 1st April 2026
(Published July 2026)

1. This Housing Land Supply (HLS) document supersedes the HLS calculation relating to the position as at 1 April 2025 (published in June 2025). This document reflects the position as at 1st April 2026, and covers the five year period 2026/27 to 2030/31.
2. A revised National Planning Policy Framework (NPPF) was published in December 2024¹, and dictates a change in approach. Previously, the NPPF set out (para. 76²) that following the adoption of a local plan there was no requirement to update the HLS where the adopted plan is less than five years old. The requirement to produce a HLS is now set out in new para. 78:

78. ...Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old. ...

3. This change to the NPPF means that Bracknell Forest Council (BFC) is required to produce an annual update of the HLS regardless of the age of the local plan.
4. In addition, para. 78 the NPPF also includes the following:

78. ... The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

- a) 5% to ensure choice and competition in the market for land; or*
- b) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply; or*
- c) From 1 July 2026, for the purposes of decision-making only, 20% where a local planning authority has a housing requirement adopted in the last five years examined against a previous version of this Framework, and whose annual average housing requirement is 80% or less of the most up to date local housing need figure calculated using the standard method set out in national planning practice guidance.*

5. Therefore, taking account of para. 78a and 78c, for the 1st April 2026 period, there are two HLS positions for Bracknell Forest:
 - a) As at 1st April 2026, up to 30th June 2026: a HLS of 4.03 years.
This is set out in **Table 1** (Section 2) of this document.
 - b) As at 1st April 2026, from 1st July 2026: a HLS of 3.53 years.
This is set out in **Table 3** (Section 3) of this document.

¹ [Updated NPPF \(12th December 2024\)](#)

² [NPPF \(December 2023\)](#)

1. Supply matters

Approach to oversupply

6. The BFLP Inspectors' report³ considers the matter of oversupply within the five year HLS in paras. 177 and 178. It was concluded that there is nothing in the NPPF or Planning Practice Guidance (PPG) to suggest that the surplus of completions within the first three years of the plan period cannot be offset against the five year requirement.
7. The previous NPPF text (para. 77) included text in relation to the approach to oversupply – it no longer features in the updated NPPF:

77. ...National planning guidance provides further information on calculating the housing land supply, including the circumstances in which past shortfalls or over-supply can be addressed.

8. However, in the Government's response to issues raised to Question 8 of an NPPF consultation⁴ in relation to oversupply, the following is referred to:

The government has considered the range of responses to this question and has concluded that the wording should be removed. This change is intended to simplify the wording of the National Planning Policy Framework and has no bearing on local authorities' ability to account for over-supply – this can continue to be taken into account as it is currently. The government will continue to keep the matter of over-supply under review.

9. The associated PPG in relation to oversupply (ID ref 68-032-20190722⁵) was not revised as part of the December 2024 updates:

How can past over-supply of housing completions against planned requirements be addressed?

Where areas deliver more completions than required, the additional supply can be used to offset any shortfalls against requirements from previous years.

Paragraph: 023 Reference ID: 68-032-20190722

Revision date: 22 07 2019

10. Therefore, in line with the above, accumulated delivery (which includes an overall oversupply) from the first five years of the BFLP plan period is taken into account within the HLS calculation.

³ [BFLP Inspectors' Report](#)

⁴ [Government response to the proposed reforms to the NPPF consultation](#)

⁵ [PPG, housing supply and delivery](#)

Deliverable supply

11. All sites contributing to the supply of land over BFLP Plan period 2020/21-2036/37 are set out in the Housing Trajectory⁶. The current version of the trajectory relates to sites in the published Housing Commitments document (i.e. reflecting the position to 31 March 2026, published July 2026). Sites which form part of the five year supply period are summarised in **Table 4** of this document.
12. The Council considers that the sites forming part of the five year HLS are deliverable (as defined by the Glossary to the NPPF), and that there is clear evidence and a realistic prospect that housing completions will begin within five years.
13. Officers visit all sites in order to obtain building progress data (not started, under construction or completed), liaise with case officers, have regard to planning history (progress on other applications linked to the sites such as approval of conditions) and liaise with developers/agents in order to inform the compilation of the Housing Commitments and Housing Trajectory. Large and medium sites are visited quarterly (end of June, September, December and March), and small sites are visited on an annual basis.
14. In terms of liaising with developers, an initial email is sent at the start of the monitoring year asking how many units are expected to be completed in the next five years.
15. It is considered that the approach taken by the Council accords with advice published in section 3 of the PPG (relating to 'Housing Supply and Delivery')⁷ (relevant paragraphs have not been revised with the December 2024 updates). The Council has had regard to the factors listed in the PPG relevant to the trajectory relating to sites.
16. For clarification in relation to the types of sites listed in reference ID 68-007-20190722 of the PPG (types of sites which need further evidence to be considered deliverable), the Council does not include the following sites within the HLS (unless they benefited from a planning permission as at 31 March 2026, and met the definition of 'deliverable'):
 - Sites allocated in a development plan
 - Sites included on the brownfield register
 - Sites listed in the 'Strategic Housing and Economic Land Availability Assessment' (SHELAA)
17. No post 31 March 2026 approvals are included within the housing figures (any such schemes will be reflected in future housing commitments/trajectory).

⁶ [BFC Housing Trajectory and Housing Commitments](#)

⁷ [PPG, Housing Supply and Delivery](#)

Approach to prior approval applications

18. Prior approval applications relate to developments which have been granted prior approval change of use from certain uses to residential. The Council is of the view that these prior approvals fall within the definition of being 'deliverable', taking account of relevant conditions, which for some prior approvals, require development to be completed within three years of the date of the permission. Prior approvals include:

- Office to C3 (PAC) - prior approval for change of use of office to a residential use (C3)
- Use Class E to C3 (PAE) - prior approval for change of use from Class E (where it relates to an office use) to a dwelling house (C3)
- Agricultural to C3 (PAA) - prior approval for change of use from agricultural use to a dwelling house (C3)
- Retail to C3 (PAV) - prior approval for change of use from retail shops, including financial and professional services to a dwelling house (C3)
- Use Class E to C3 (PAE) - prior approval for change of use from Class E (where it does not relate to office use) to a dwelling house (C3)
- Class B8 to C3 (PAB) - prior approval for change of use from a storage or distribution centre (B8) to a dwelling house (C3)

(NB: References in brackets relates to BFC application suffixes used by BFC prior to the introduction of a new planning applications management system in 2026, so will be reflected in older data, and this document. Going forwards, application format will be 'PA/year/application number').

19. The PPG ('when is permission required'⁸) explains that "*Permitted development rights are a national grant of planning permission which allow certain building works and changes of use to be carried out without having to make a planning application. Permitted development rights are subject to conditions and limitations to control impacts and to protect local amenity*" (reference ID: 13-016-20140306).

20. The above-mentioned 'conditions and limitations' imposed on prior approvals do not include the requirement for development to mitigate against its impacts on the Thames Basin Heaths Special Protection Area (SPA). Instead, this is a separate Regulation outside the GPDO and the Town & Country Planning Act 1990 (as amended) (TCPA). Therefore, planning permission is granted for prior approval developments without limitations under the GPDO.

21. The requirement for SPA mitigation for prior approvals falls entirely under the Habitats Regulations regime, and not the GDPO or the TCPA. Accordingly, any enforcement of SPA mitigation falls under a separate regime to planning regulations in the case of prior approvals.

22. The trigger point for SPA mitigation is prior to the occupation of residential units (this is because the buildings already exist, with internal layout works not normally forming planning development, and therefore the change of use of development is only triggered upon active occupation). It is therefore the case that many developers undertake the internal renovation works prior to the completion of the Section 106 for SPA mitigation, limiting any overall delay.

23. In addition, for prior approvals, the required Section 106 agreements are 'single issue', solely to provide mitigation in the form of Suitable Alternative Natural Greenspaces

⁸ [PPG, when is permission required](#)

(SANGs) and contributions towards Strategic Access Management and Monitoring (SAMM) measures. There is sufficient SANG capacity available in the Borough, which can be secured through a Section 106 (normally, in the case of prior approvals, through purchasing SANG capacity from a third party SANG provider).

24. The Council therefore sees no reason why these prior approval developments should not be classed as 'deliverable', and for this reason they form part of the Council's five year HLS.

Approach to windfall allowance

25. The term 'windfall' relates to sites that have not been specifically identified as available through the local plan process. Para. 75 of the revised NPPF states that where an allowance is made for windfall sites as part of the anticipated supply, there should be compelling evidence that it is a reliable source of supply.
26. The Council considers that in line with para. 75, inclusion of a windfall allowance is justified. As part of the BFLP examination, the Council assessed the contribution likely to be made by 'windfall' sites based on sites that have not been allocated but that have come forward and been completed over a ten year period.
27. The approach taken to the windfall allowance within the Housing Trajectory is set out in para. 6.15 of the BFLP, i.e.
- 24 dpa (net) for small sites (less than 5 units/less than 1ha,
 - 77 dpa (net) for medium sites (5+ units/less than 1ha).
28. Small sites with outstanding planning permissions are not listed in the Housing Trajectory – the windfall allowance is relied upon for the number of future completions on small sites.
29. Medium sites with outstanding planning permission are listed in the Housing Trajectory. To avoid double counting, no allowance is included for the first two years of the projected figures and only 50% of the allowance is included for the third year of the projected figures. These assumptions are based on an analysis of the time taken to complete a medium sized site. In relation to large sites, no windfall allowance has been included. If such sites come forward, they will be reported through the monitoring process.
30. This approach was endorsed by the BFLP Inspectors, taking account of Main Modifications to the BFLP (see paras. 45 and 171 of the Inspectors' report).

Approach to C2 use bed spaces

31. Prior to December 2024, the Council had applied a 1.8 ratio to convert bed spaces to a dwelling equivalent for inclusion within the Housing Trajectory (based on the July 2018 HDT Rule Book). The Rule Book⁹ was updated on 12 December 2024, and now includes an updated ratio of 1.9. This has been updated to take account of the 2021 Census. For past completions relating to monitoring years 2020/21-2023/24 of the plan period, the 1.8 ratio has been applied. The new ratio has been applied to commitments and completions for the period 2024/25 onwards.

⁹ [HDT Rule Book \(December 2024\)](#)

2. 1st April 2026 Housing Land Supply position up to 30th June 2026

Housing requirement

32. As set out in para. 78 of the revised NPPF, the HLS should be measured against the housing requirement in adopted strategic policies, or against the local housing need where strategic policies are more than five years old.
33. Given that the BFLP was adopted in March 2024, it is less than five years old. Therefore, the BFLP housing requirement of 614dpa (as contained in Policy LP4) should be used within the HLS calculation.

Housing Delivery Test (HDT) and application of NPPF ‘buffer’

34. The Government introduced the HDT in 2018, with the first results of the HDT being published by the Secretary of State in November 2018. The HDT measures the net additional dwellings provided in a local authority area against the homes required, using national statistics and local authority data. The HDT provides a measure based on the preceding 3 financial years.
35. The current published HDT result relates to the ‘2023 measurement’ (published on 12 December 2024¹⁰), and covers the period 2020/21, 2021/22 and 2022/23. The data shows that between 2020/21 and 2022/23, the Council delivered 137% of its housing requirement.
36. As yet the 2024 measurement has not been published, the following information is provided on the HDT website:

Stakeholders will be aware that we are currently operating to a delayed publication timetable for HDT as a result of planning reforms and associated consultations. We recognise that authorities, developers and others rightly expect the HDT to be published according to a regular timetable. We are therefore, considering options for expediting future HDT collections, including the possibility of combining the data collections for the 2024 and 2025 HDTs. We will update in due course.

37. BFC anticipates that it will exceed the national 85% threshold set out in para. 78b of the NPPF for the 2024 measurement, and (as above) delivered in excess of its housing requirement for the 2023 measurement period. Therefore, there is no requirement to add a 20% buffer to the Council’s HLS (as set out in para. 78b of the NPPF).
38. Therefore, in line with para. 78a of the NPPF, a 5% buffer is required (for the position up to 30th June 2026).
39. **Table 1** sets out the HLS calculation up to 30th June 2026 position, adding a 5% buffer to the calculation.

¹⁰ [Housing Delivery Test 2023 Measurement](#)

Table 1: Five year supply calculation as at 1 April 2026 – position up to 30th June 2026

(a) Housing requirement over the next 5 years (2026/27-2030/31)	3,070	614 x 5
(b) Requirement up to 31 st March 2026, since the base date of the plan (2020/21-2025/26)	3,684	614 x 6
(c) Total completions achieved up to 31 st March 2026, since the base date of the plan (2020/21-2025/26)	4,075	2020/21: 973 2021/22: 779 2022/23: 437 2023/24: 924 2024/25: 416 2025/26: 546
(d) shortfall/surplus (b-c)	Plus 391	
Total requirement over the next 5 years		
LHN requirement taking account of completions to date	2,679	Requirement over five years minus surplus (a-d)
Plus NPPF buffer	2,813 (rounded)	5% as set out in para. 78a
<i>Annual 5 year HLS requirement over next 5 years</i>	<i>563 (rounded)</i>	<i>2,813/5</i>
Deliverable supply (projected completions 2026/27- 2030/31)	2,267	
Five year HLS	4.03 (rounded)	2,267/563 (or 2,267/2,813 x5)
Surplus/shortfall	-546	2,267-2,813

3. 1st April 2026 Housing Land Supply from 1st July 2026

Housing requirement and application of NPPF 'buffer'

40. As set out in para. 78c of the NPPF, from 1st July 2026, for the purposes of decision-making only, a 20% buffer is required where the housing requirement adopted in the last five years is 80% or less of the most up to date local housing need figure calculated using the standard method set out in national planning practice guidance¹¹. **Table 2** (below) sets out the local housing need figure for BFC based on the standard method:

Table 2: BFC local housing need for 2026, based on standard methodology

1. Setting the baseline	
a. Dwelling stock estimate 31 March 2025: (Updated 21 st May 2026)	54,967
Table 125 unrounded: https://assets.publishing.service.gov.uk/media/682df34d7fb7a7d9cd77519b/LiveTable125.ods	
b. 0.8% of dwelling stock	439.7
2. Adjustment for affordability	
a. Five year average of affordability ratio (table 5c: House price to workplace-based earnings ratio - Office for National Statistics (ons.gov.uk) , published 26 March 2026)	9.17
b. Affordability adjustment factor (if ratio is above 5) $1 + [(five\ year\ average\ affordability\ ratio - 5)/5] \times 0.95$	1.79
3. Minimum LHN	
(adjusted housing stock baseline x affordability adjustment factor) (1b x 2b)	787

41. The BFLP was adopted in March 2024, so contains a housing requirement adopted within the last five years. Policy LP4 includes a housing requirement of 614dpa. This is 78% of the LHN set out in **Table 2** (614/787) and is therefore less than 80% of the LHN.

42. As such, a 20% buffer in line with para. 78c of the NPPF is required from 1st July 2026.

43. **Table 3** sets out the HLS calculation from 1st July, adding a 20% buffer to the calculation.

¹¹ [PPG standard method](#)

Table 3: Five year supply calculation as at 1 April 2026 – position from 1st July 2026

(a) Housing requirement over the next 5 years (2026/27-2030/31)	3,070	614 x 5
(b) Requirement up to 31 st March 2026, since the base date of the plan (2020/21-2025/26)	3,684	614 x 6
(c) Total completions achieved up to 31 st March 2026, since the base date of the plan (2020/21-2025/26)	4,075	2020/21: 973 2021/22: 779 2022/23: 437 2023/24: 924 2024/25: 416 2025/26: 546
(d) shortfall/surplus (b-c)	Plus 391	
Total requirement over the next 5 years		
LHN requirement taking account of completions to date	2,679	Requirement over five years minus surplus (a-d)
Plus NPPF buffer	3,215 (rounded)	20% as set out in para. 78c
<i>Annual 5 year HLS requirement over next 5 years</i>	<i>643 (rounded)</i>	<i>3,215/5</i>
Deliverable supply (projected completions 2026/27- 2030/31)	2,267	
Five year HLS	3.53 (rounded)	2,267/643 (or 2,267/3,215 x5)
Surplus/shortfall	-948	2,267-3,215

Table 4 – sites contributing towards the five year HLS

Projections (small Sites windfall allowance, medium Site windfall allowance, prior approvals subject to s.106)									

Site Address	Application Reference/s	No. Bedrooms (C2 use - net)	Projected Net Completions (April-March)					Total Net	Site Status (as at April 2026)	
			2026/27	2027/28	2028/29	2029/30	2030/31			
HARD COMMITMENTS (residential care and nursing home bedspaces in C2 use) (NB: for C2 uses, in line with the Housing Delivery Rule Book (December 2024), a ratio of 1.9 has been applied to the number of bedroom spaces to derive an equivalent number of dwellings, rounded to the nearest whole unit, for overall total) for projected completions for 2024/25 onwards. Completions prior to 2024/25 are based on the previous ratio (July 2018) of 1.8)
