

Bracknell Forest Council

Charges for Traffic Data

April 1st 2011 – March 31st 2012

These charges relate to simple requests for data held by the Council within databases of automatic traffic counter sites, records of previous temporary or manual surveys or generated from the Bracknell Multi-Modal Models. Requests that require a full run of a model (e.g. to assess a new development) will be subject to the charges outlined in the note *Bracknell Multi-Modal Transport Models - Protocol for External Use*.

Link Flow and Turning Count Survey Data

- Link flow data (automatic traffic counter (ATC) sites or temporary sites). Speed or classification may also accompany link flows. To be charged at £148.70 per site for temporary sites and £148.70 for each report on an ATC site;
- Manual turning/ classified count data to be charged at £504.55 per site.

Where such survey information is unavailable, there may be scope to use information from the 2007 base year and 2026 future year models. In this case, the model charges listed below would apply.

Data from the Base Year and Future Year Bracknell Multi-Modal Models

- Link flows. **£148.70 per link;**
- Turning flows. **£504.55 per junction;**
- Zonal information such as such as population, employment, car availability etc by zone. **£531.10 per zone;**
- Select link information to show indicative origin-destination movements of traffic on a specific link or route. **£265.55 per request;**

The charges listed above are inclusive of VAT (currently 20%).

Charges for other information from the model not listed above will be agreed at the scoping stage.
